Most importantly, select courses that help narrow your career exploration options!

New Courses to Consider for 2023-2024

CTS-3090

Introduction to Athletic Training

0.5 Elective Credit

Prerequisite: Health Careers I, Principles of BioMed, Human Body Systems, or Anatomy & Physiology

Introduces athletic training and basic principles of preventative care. Explore the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures. This course may require hours of internship.

ELE-3541/3542

Jobs for American Graduates I

1.0 Elective Credit, recommendation by counselor or teacher

JAG empowers students to take the lead on planning projects centered on civic responsibility, leadership, social interaction, academic performance, and professionalism. The purpose of the JAG-SD program is to provide participants with classroom and work-based learning experiences that result in developing skills needed to be successful in life, leading to a fulfilling career after graduation.

CTC-3090

Computer Gaming & Design

0.5 Computer Science Credit

Computer Gaming and Design prepares students to design computer games by studying design, “the origin of game theory”, animation, artistic concepts, digital imaging, coding, scripting, multimedia production, and game play strategies. Advanced course topics include but are not limited to, level design, environment and 3D modeling, scene and set design, motion capture, and texture mapping.

ELE-3551/3552

Jobs for American Graduates II

1.0 Elective Credit

Prerequisite: JAG I

ELE-3561/3562

Jobs for American Graduates III

1.0 Elective Credit

Prerequisite: JAG I, JAG II

New Science Courses to Consider for 2023-2024

SCS-3050 Forensics

0.5 Science Credit

Prerequisite: Algebra I & Biology

Apply scientific knowledge and principles to college, preserve and analyze evidence in a laboratory setting. Topics include entomology, forensic anthropology, serology and fingerprinting.

SCE-3010 Earth Science

0.5 Science Credit

Prerequisite: Biology

Do you like rocks and dinosaurs? Do you want to learn about the Earth and its history? Earth Science covers the ever changing Earth, fossils, dinosaurs, rocks, minerals, and the oceans. Sign up for Earth science and learn more about our dynamic planet.

SCH-3031/3032 Real World Science A/B

1.0 Science Credit

Prerequisite: Biology

Real World Science will cover unique concepts of science. Topics such as nuclear chemistry, household chemistry, explored through real-world applications.
